

TRUECOLOR
TECHNOLOGY

Tecasafe® fabrics are engineered to stand up to repeated industrial launderings while maintaining shade, shape and like-new appearance. This means the comfort and color you wore the first time will be the comfort and color you wear every time.

EXTERIOR

TRUE COLOR TECHNOLOGY

Tecasafe® TRUECOLOR delivers deep, rich dark shades of navy that will stand up better to repeated launderings and have set the new standard for colorfastness.

By retaining its original color without fading, heathering or shrinking, Tecasafe® TRUECOLOR is the ideal solution for garments that must be laundered frequently.

TenCate engineers FR fabrics that perform above and beyond industry standards. By listening to the market and meeting the needs of end users, TenCate develops FR fabrics that will serve well in the field and deliver when it counts the most. Tecasafe® TRUECOLOR means that the shade you wore the first time will be the shade you wear every time. Tecasafe is synonymous with FR protection, comfort and ease of wear. Now its synonymous with outstanding colorfastness too.

EVEREST

INTERIOR

EASY CARE

Tecasafe® EVEREST is an inherently FR fabric. This means that the protection will never wash or wear out: it's engineered right into the fabric. No special care needs to be taken when laundering your garment. Tecasafe® EVEREST stands up to industrial laundering time after time without loss of appearance, comfort or protection. This means that the garment will enjoy a longer life and stand up to rough conditions creating a better value and lower cost per wear. Workers have enough to worry about, Tecasafe® EVEREST delivers the best so their PPE won't be an added worry.
